### LONDON ELECTION.

Associated Press Dispatches by  
The Tribune's Special Leased Wire  
LONDON, Nov. 1.—Elections for members of the new borough councils are proceeding through London today. The metropolis will hereafter consist of twenty-eight municipalities, each having a Mayor. There are nearly 200 candidates for the 125 councilships and undermembers. The contests are being fought out on political lines.

### LEGISLATORS FIGHT.

Associated Press Dispatches by  
The Tribune's Special Leased Wire  
ATLANTA, Ga., Nov. 1.—A special from Valdosta, Ga., says a fight in which knives were used occurred on the train bringing in the Georgia legislators to attend the 81st Legislature. Mr. Harden, of Wilkes county, was severely stabbed. Chann of Chatham and two others were injured in trying to stop the fight. Mr. Harden's condition was so serious that he was left at Forsyth for treatment.

## HAYNE WASTING TIME OF COURT.

### Contra Costa Company is Now Proving the Value of Its Plant.

Something like coherence is beginning to appear in the big water suit. Engineers Boardman and Hewson have laid the ground work by testifying to the various pieces of property owned by the Contra Costa Company and the purposes for which they are used—with the important exception of the plant of the Oakland Water Company. It remains now for the experts to fix the valuation.

The first branch of the case, namely, the validity of the water ordinance is practically settled. It is generally considered by lawyers and all others who have watched the proceedings that the ordinance is as good as dead. The testimony of the Councilmen did it. Under the rule laid down by the Supreme Court in the San Diego case, the ordinance seems to be invalidated by the testimony of those who framed it.

Practically the issue from now on will be the value of the plant.

CHABOT'S OLD FORKMAN.  
This morning Octave Lenieux who was for many years in the employ of A. Chabot and subsequently of the Contra Costa Company, his successor in interest, gave a very interesting account of the construction of the San Leandro dam. As he was a foreman there he is familiar with all the details of the work and the various methods employed in the construction and explained why many things were done that have heretofore appeared somewhat singular. During the course of construction the ground which was to be the site of the dam was a very rough hillside. Some of the cuts were 12 or 15 feet deep. Several culverts had to be built. Altogether, the witness supervised the construction of about 12 miles of roads. He did not have charge of all the road building there. Witness said there were washouts every year which had to be repaired.

On a cross-examination witness said Frank Boardman, son of the engineer, was superintendent of the work. Besides himself there were half a dozen other foremen. One man named Ward, the witness said, was very noisy. There were five different gangs of Chinese. Each branch of the work had a man in charge of it. Frank Boardman, the witness said, took their orders from the engineer. But when Mr. Chabot was on the ground he bossed everybody.

"He was the boss, was he?"  
"Yes, he was the boss," said Lenieux, who is a Canadian Frenchman, excited considerably in his replies to the special attorney for the city. He met the insinuating efforts to get him to commit himself to the statement that the lawyer with reiterations full of sturdy common sense.

"Did Mr. Chabot buy the horses?" asked Hayne.  
"Yes," said Lenieux.  
"Bought them pretty cheap, didn't he?"  
"He paid a pretty good price for them," said Lenieux.  
While he was speaking McCutcheon entered an emphatic objection.  
"That's all right," said the witness.  
"I can give him all the facts," whereat the courtroom litigant got through with them," said Hayne, returning to the charge.

"Yes."  
"Made money on them, didn't he?"  
"I don't know what he got for them," said McCutcheon.  
"The witness provoked a little by saying: 'I'm enough for a litter.'"  
"I don't want to trap you, Mr. Lenieux," said Hayne, suavely. "I only want to find out how much you know about it."  
"I will tell you just what I know and nothing more," retorted the witness.

STILL HARPING ON MY DAUGHTER.  
Witness said the construction accounts were kept by Frank Boardman. This started Hayne off on one of his tangents about books.  
"Now I make a demand that these books be produced," he said with an air of great gravity.  
"It's the first time I ever heard there were any such books," said McCutcheon. "The plaintiff lawyers are talking about any books Mr. Boardman may have kept."  
"I suppose there were among the books burned," said Hayne with a ferocious look.  
"Go on," said McCutcheon contemptuously.

Hayne soon let Lenieux go as he was absolutely unable to make anything out of him. Witness said that he had been told that the land used had to be paid for. Mr. Boardman had so informed him.

THE PIPE SYSTEM.  
President Watkinson was recalled and asked to state the quantity of the various kinds of pipe in use by the Contra Costa Company in 1877. He was shown the pipe register, a sheet containing a detailed statement of the pipe in the system. Witness said he had made the entries upon the report of Mr. Prindle, the superintendent of the pipe system. Mr. Prindle reported the laying of all new pipe and all changes and entries on the pipe register.

At first the entries were made in writing, and after the entries were made Prindle and Watkinson made a comparison to insure accuracy. At first the entries were made on an annual sheet, but were subsequently entered upon the maps and the pipe journal. Hayne objected to Mr. Watkinson being permitted to testify from the annual pipe sheet because he did not know of his own knowledge about the pipe laying. After some discussion Mr. Watkinson was withdrawn and Mr. Prindle recalled.

HOW THE RECORD WAS KEPT.  
Prindle said he made a report of all the pipe in the ground in the year 1877. Watkinson made a copy of it and then compared it with the original. Every year since that time the same proceeding was gone through. These reports show all the changes in the pipe system made from year to year since 1877.

The earlier maps were made either by Frank Boardman or W. F. Boardman. Hayne made them of late years. Prindle said he scaled the entire pipe system in 1877 by special direction. Whenever he was in doubt as to the

size of a pipe he dug a small hole to make sure.

HOW HE SCALED THE PIPE.

Hayne drew from the witness a statement that he had scaled the maps and the surveying triplicated him. "You had charge of the pipe system, didn't you?" asked McCutcheon.  
"I have had full charge of it for the last thirteen years since I entered the Company's service in 1877," said Hayne.

"You knew the pipe was in the ground, didn't you?"  
"Yes, I was constantly digging up pipe and changing services," said Hayne. "I brought out the fact that for many years he was on the service wagon, putting in pipe and making alterations."

"That was a plumber, then?"  
"That was my trade," said Hayne. "In there anything about the plumbers' trade which makes it your business to scale pipes?" he asked sarcastically.  
"I'd like to see a plumber go into a building and tell about the pipe in it if he did not know something about scaling it," said McCutcheon.

McCutcheon drew out the fact that for more than twenty-five years Prindle had been a plumber. He was a complete personal familiarity with the system.

A "COMMON PLUMBER."  
Hayne still objected to the introduction of the pipe sheet on the ground that the scaling had been done by a plumber instead of a draughtsman.  
"This man is not a common plumber," he said, "but a man with a special skill. He can tell anything about such work. He made some measurements on the map and working data. He is a plumber and a draughtsman."

Hayne's argument was an inadmissible one, and the witness was not permitted to introduce the original scaling in 1877 had been the basis of the pipe record ever since. Hayne's argument was that the scaling in 1877 had been the basis of the pipe record ever since. Hayne's argument was that the scaling in 1877 had been the basis of the pipe record ever since.

ONLY CAUSES DELAY.  
McCutcheon said the only effect of Hayne's objection would be to cause five or six days' unnecessary delay in proving the pipe sheet.

"Mr. Prindle is personally familiar with the pipe system and the company itself relies upon his information. He is not a common plumber, but a man with a special skill. He can tell anything about such work. He made some measurements on the map and working data. He is a plumber and a draughtsman."

A TECHNICAL FLEA.  
Hayne made his last technical plea. He said the maps did not prove what was under the ground. Watkinson went back to a report, the report went back to Prindle and the report went back to a map which was not verified.

McCutcheon said the map would be produced and verified.  
The witness said that Watkinson could answer from the pipe sheet.  
Hayne interposed objection in detail to every question that was asked.

Witness said the changes and entries in the pipe sheet were made by Mr. Prindle and the entries in the pipe sheet were made by Mr. Prindle and the entries in the pipe sheet were made by Mr. Prindle.

Court took a recess till 1:30 o'clock.  
HEWSON KEPT THE PIPE RECORD.  
Who kept the pipe record from 1891 down to the present time? asked McCutcheon of Watkinson at the afternoon session.

"Mr. Hewson," said Hayne.  
Prior to the time when Mr. Hewson began keeping the record Mr. Watkinson said he made his entries as heretofore detailed. Mr. Boardman made the maps of the pipe system and the entries in the pipe sheet were made by Mr. Boardman.

Again it was demonstrated that Hayne's pursuit of data that he deemed inaccessible on the old map was a barely legitimate statement that the site of the dam occupied an area of six and one-half acres filled out in square feet. From is more than has been figured on heretofore. McCutcheon promptly offered the map in evidence.

"When did you make this map?" he asked.  
"Some time prior to 1888," said Hayne.  
"How long prior to 1888?"  
"Where did you get the data?"  
"From actual surveys made by myself," said Hayne.

"Did you enter your business in a field book?"  
"Yes," said Hayne.  
"Where is the field book containing the notes of this survey?"  
"I don't know whether it is in my office or in the office of the water company," said Hayne.

Yesterday's Proceedings.  
When THE TRIBUNE went to press yesterday Engineer Hewson was still on the stand.

"Yes, sir."  
"There is no use for it in winter?"  
"No."

Witness described one piece of telephone line four and one-half miles long belonged to the Company. It was a double wire strung on poles erected by the Company. The insulators also belonged to the Company.

On a cross-examination Hewson said that in addition to the map of the San Leandro reservoir he had given Mr. Pierce a map of the Mount Eden tract which Mr. Pierce owned, also a map of Mr. Pierce's building. There was also a map of the Contra Costa pipe system made about 1890 by a draughtsman named Miller, then in the employ of the Company. It had been made for Mr. Pierce's private convenience. He wanted a map made that would show the size of the pipe at a glance. This map had never been duplicated.

Hayne demanded that the map be produced. McCutcheon said this was absurd. The map was not in the possession of the Company and only showed the pipe system prior to 1900.

"We have books and maps which are open to inspection showing the same thing. Your experts have examined them."  
In response to Hayne's questions Hewson said he had books showing the map system in detail for each year since 1890. These he produced. Immediately Hayne's curiosity vanished. It developed that the map simply delineated the larger pipes in only a portion of the city of Oakland. It was not a map of the whole system, but only of the chief arteries of the distributing system in Oakland. Hayne's anxiety about data relating to the system disappeared when McCutcheon insisted that as the evidence of these books had been brought out by the other side, the books themselves must be admitted in evidence. Hayne stoutly resisted. He wanted the books badly if they could not be had, but he had no use for them if they could be produced.

The dispute waxed so hot that finally the reporter's notes were appealed to for a settlement as to whether or not Hayne had put his foot in it by going off on fishing excursions. Judge Hall relieved Hayne from a very embarrassing position by sustaining his objection.

McCutcheon then proposed to offer in evidence the books of the pipe system written by Hewson himself, but Hayne complained that his experts had not been given sufficient time to examine them.

"I understand Mr. Miller worked on them less than an hour last Sunday," said McCutcheon.  
Hayne disputed the assertion.  
"They were at his service at the Company's office all day Sunday," said Moore, and I can tell you that he was there all day less than an hour."

"How long was Mr. Miller at the Company's office last Sunday?" asked McCutcheon.  
"Hardly an hour, I think," replied Hewson.

This ended the examination of Hewson, the pipe matter being left out for the present by agreement.

A BIG FORCE EMPLOYED.  
Octave Lenieux testified that he was employed as a foreman in the construction of the San Leandro dam. In 1877 seven or eight hundred men were employed there under the direct supervision of Boardman.

The dam was a hard job. It had to be blasted out. It was hauled to the bluff and dumped through a chute into the dam. The dumping had to be done at night so as not to interfere with the work of construction. The clay was spread in layers about six inches deep, sprinkled and tamped down by the horses, and lastly rolled by a big roller drawn by six horses. In certain portions of the dam the clay was tamped by hand.

THE DAM WAS IN COURSE OF CONSTRUCTION about three years. About fifty large teams and between 200 and 250 single teams were employed in the construction. The puddle pit was between ninety and one hundred feet wide and something like 400 feet long. The excavation was about twenty feet in the bed of the creek.

HE DID THE SLUICING.  
"Was any sluicing done there?"  
"Lots of it," said Hayne.  
"Who did it?"  
"I did most of it," said Hayne.

Witness said a temporary dam was constructed to hold the water while the dam was being built. Water was also used to supply the dam. The water had to be pumped. The sprinkling was going on all the time. Sand for the concrete and mortar was brought from San Leandro bay. Between twenty-five and thirty men were kept busy tamping the portions of the dam that could not be packed by horses and rollers.

WHITE LABOR EMPLOYED.  
The largest force employed was 300 men. The cart drivers and men handling the clay were mostly Chinese. The men employed in the tunnels were all white. They received \$1 a day and board.

CALEB POWERS' CASE  
Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
FRANKFORT, Ky., Nov. 1.—In the Court of Appeals, the case of Caleb Powers vs. State Coal & Coke Co. was granted an order compelling the Clerk of the Court of Scott county to furnish a record of the Scott trial to the court free of cost. The affidavits of Powers and several of his friends were filed, showing that he has expended all his fortune and is now a pauper. The state of the case is that Powers' claim for damages for the loss of his life in the Scott trial was extinguished until November 5th.

BANK CIRCULATION  
Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
WASHINGTON, Nov. 1.—The monthly circulation statement issued by the Comptroller of the Currency shows that at the close of October 31, 1900, the total circulation of national bank notes was \$201,655,000, an increase for the year of \$33,610,500 and an increase for the month of \$1,239,500. The circulation based on United States bonds was \$238,521,135, an increase for the year of \$50,200,225 and an increase for the month of \$1,639,221. The circulation based on the year of \$275,777,777 and a decrease for the month of \$1,239,500. United States registered bonds on deposit to secure circulation were \$201,655,000 and to secure public deposits \$101,023,220.

To Cure a Cold in One Day  
Take Laxative from Colic Tablets. It will cure a cold in one day. If it fails to cure, E. W. Grove's signature is on each box.

## FINE IMPROVEMENTS AT OAKLAND BANK.

Will Soon Be One of the Show Places of the State.

The improvements contemplated in the interior arrangements of the Oakland Bank of Savings at Twelfth street and Broadway, and for which plans have been drawn, will give that well-known institution one of the handsomest interiors of any banking institution in the country. Those who have seen the plans and are familiar with the interior of Eastern banks say there is nothing in the East that will compare with it.

It is the intention to add to the bank the store room on the east. The safety deposit vaults will be extended to and including this additional room, giving space for several thousand saving deposit boxes.

A part of the coin and book vault that now projects beyond the present safety deposit vault will be removed, making an even front to the entire vault system. The doors of the vault will be massive, of the hardest metal obtainable, and the exterior handsomely chased and ornamented.

This arrangement will give the bank 100 feet of plate glass frontage on Twelfth street, with probably seventy feet vault frontage directly in the rear of the clerks and with the doors constantly in view. When the changes are completed the Oakland Bank of Savings will be one of the show places of the coast.

## BURGLARS WORK AT EAST OAKLAND.

Homes of Mrs. Tubbs and Mrs. Scott Were Robbed Last Night

Burglars turned three tricks last night. With the rain on the roof, the night was conducive to sound sleep and the lads of the jimmy were active. They have been operating in the Fruitvale district outside the city limits for some weeks, but emboldened by their success they have had the temerity to cross the line into Oakland where the night police will get them "if they don't watch out"—maybe.

The residence of Mrs. Tubbs at 268 East Twelfth street was entered some time during the night and several articles of minor value taken. From there they went to the next block and as the residence of J. W. Scott at 188 East Twelfth street looked promising they entered it with only nominal success, taking a few articles of small value.

Down at 507 Washington street in the business center of the city the door of a candy store was forced open and taken from the till and a lot of chewing gum taken from the show case. This last act leads to the horrible suspicion that a woman is mixed up in the burglaries.

## TO CHECKMATE DOWIE

Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
LONDON, Nov. 1.—It is announced that the twenty-five lace workers hired by John Alexander Dowie, the Zionist of Chicago, sailed from Southampton October 31st for Zion City. The United States consular officers think that undoubtedly the men come under the provisions of the contract law. Communication on the subject has passed between the London and Nottingham consulates and the latter is communicating the matter direct to Washington.

## STEAMER EVA LOST AT SEA.

Left Portland With a Cargo of Flour for Hongkong Early Last Month.

Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
PORTLAND, Or., Nov. 1.—A cablegram received in this city from London states that the steamer Eva, that left Portland October 6th with a cargo of flour for Vladivostok and Hongkong has been lost at sea.

The Portland Flouring Mills Company, consignors of the cargo, received the cablegram but they state that no particulars were given.

## ROCKHILL WILL ASSIST CONGER.

Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
WASHINGTON, Nov. 1.—Secretary Hay today called Commissioner Rockhill an appointment as counselor of the American legation at Peking. He has been directed to proceed at once from Shanghai to Peking to assist Minister Conger in that capacity in the negotiations for a final settlement.

The purpose to appoint Rockhill and General Wilson fellow commissioners with Mr. Conger to conduct the negotiations was abandoned only because it appeared that no other power would appoint commissioners.

## FABIOLA DONATION TOMORROW AFTERNOON.

The Fabiola Hospital Association will hold its annual donation reception tomorrow afternoon at the hospital building, corner of Mass avenue and New Broadway. Help the hospital by sending a donation. Remember the sick when you order at your grocery store.

## HARRISON STREET WORK IS ALL WRONG.

The preliminary proceedings in regard to opening Harrison street are all wrong and the work must all be done over again.

## CHINA WILL NOT BE PARTITIONED.

Combination of Powers Assures Territorial Integrity of the Empire.

Associated Press Dispatches by  
The Tribune's Special Leased Wire.  
WASHINGTON, Nov. 1.—The Atlantic German agreement is now complete. Aside from Italy and Austria, whose adherence to the agreement was expected, owing to their political relations with Germany, Japan is the only one of the powers which has given unconditional assent to the agreement. As the matter now stands, five of the powers are united in all the terms of the agreement, viz: Great Britain, Germany, Italy, Austria and Japan. Three of the powers, the United States, France and Russia, accept the clauses relating to the open door and the territorial integrity of China, but withhold action on the third clause relating to further procedure in case any power seizes territory.

Neither the State Department nor the Russian Embassy has received information of Russia's answer, though the Associated Press in its London dispatch announced that the reply had been received at the British Foreign Office October 30th and unreservedly accepted the first two clauses. In regard to the third clause, Russia referred the two contracting parties to the Russian circular of April 25th, saying that she would modify her attitude according to circumstances.

HE MARRIED THE OTHER YOUNG LADY.  
W. L. Goodwin is Arrested at the Instance of an Old Sweetheart.

W. L. Goodwin, a meterman, had his wedding trip cut short yesterday by his arrest on the charge of misdemeanor embezzlement. He married the other woman, and she was about to leave on their tour the other girl had him arrested.

The latter is Miss May Murphy, who alleges that while Goodwin was keeping company with her she had been seduced by him several times, he promised to return them the next day. This she says he refused to do and she has a suspicion that he has disposed of them. His deposited \$50 bill and was released. He was arraigned before Police Judge Smith this morning and his trial set for tomorrow.

BRYAN BUSY IN CHICAGO.  
Will Remain There Till Saturday Night, When He Leaves for Home.

CHICAGO, Nov. 1.—W. J. Bryan arrived here at 4 P. M. under escort from Hammond, Ind., by several hundred members of the Cook County Democratic Club and the Cook County Central Club, and half an hour later addressed a business men's meeting on the lake front. In the evening from 7 to 11 P. M. he will make eight speeches on the northwest side of the city. Tomorrow he will make nine speeches and five Saturday, leaving here late Saturday night for Lincoln, Neb.

Plans for the erection of a large circus tent for the lake front meeting today and Saturday were abandoned because of Montgomery Ward, who threatened to invoke the aid of the courts, which has ruled that no construction may be put on the lake front for the purpose of making it in that vicinity.

CREDITORS' AUCTION SALE  
Of Groceries, Hardware, Show Cases, Scales, Etc.  
Tomorrow, Friday, November 2, 1900, at 10 o'clock A. M. at 418 Broadway, I shall sell at public auction all the groceries, etc., of George P. Smith, consisting in part of tea, coffee, canned goods, soap, glassware, counters, scales, hardware, etc. Terms cash.  
M. MARCUS, Auctioneer.

Born.
